IS HOW

WE LEAD

PPE minor Mirna Cadet sits in the reading room her team set up at the Buffalo City Mission for their PPE capstone project.

MICRO-CREDENTIAL IN

COMMUNITY LEADERSHIP

A PPE FRAMEWORK

Community Leadership is a three-course micro-credential that provides undergraduate students with an integrated set of skills and experiences from Philosophy, Politics & Economics (PPE) that will enable them to practice social innovation and create positive change within their communities.

Skills you need. Proof you have them.

Our program is open to anyone interested in developing their abilities to analyze social problems from multiple perspectives, productively resolve conflicts, and engage diverse groups of people, all in order to devise sustainable solutions to those problems. Students in the program will also put those skills into practice by completing a community engagement project under the mentorship of a PPE faculty member.
